ABOUT ME

Enthusiastic and detail-oriented Computer Science and Engineering graduate with a strong foundation in Java, Python, Data Structures & Algorithms, Object-Oriented Programming, Web Development, and Database Management Systems. Skilled in building full-stack web applications using React.js, Node.js, Express.js, and MongoDB, along with developing machine learning-based projects. Passionate about software development, problem-solving, and learning new technologies. A quick learner and team player, eager to contribute to innovative projects while continuously improving technical and professional skills as a Software Developer.

PROJECTS

Online Photographer Booking :CLICKSY

- Designed and developed an integrated web-based platform that connects photographers and clients in a seamless way. The system allows users to explore portfolios, compare services, book photography sessions, and make secure online payments.

Weather Forecasting System

- Developed a weather forecasting application that predicts atmospheric conditions based on parameters such as temperature, humidity, and wind speed. The system applies machine learning techniques and pattern recognition to analyze data trends and generate short-term forecasts.
